Remedy Interactive Expands European Presence with Ergonomics Reseller Partnerships in Belgium, Denmark and Germany

Sausalito, CA — November 30, 2011 — [Remedy Interactive](#), Inc., a leading provider of enterprise software solutions that help organizations prevent workplace injuries, today announced that it has expanded its global reach by partnering with three new European companies that specialize in ergonomics and injury prevention product sales: [Ergo Comfort](#) in Belgium, [Contentus](#) in Denmark and [Arets Ergonomie](#) in Germany. Today Remedy Interactive also celebrates its 10th anniversary with three other international resellers: [ergonomicoffice](#) and [Ergonomics Now](#), both in Australia, and [Keytools](#) in the United Kingdom.

Ergo Comfort, Contentus and Arets Ergonomie will all resell Remedy Interactive's desktop injury prevention solution, [RSIGuard](#) International Edition, which features eight languages: Danish, Dutch, English, French, German, Norwegian, Portuguese and Spanish. RSIGuard can be customized regionally as well. For example, current reseller Ergonomicoffice sells a localized version of RSIGuard called Guardian Ergonomic Office Software™ or Guardian-EOS™ which is tailored to the needs of the Australian market.

Recent European studies provide substantial evidence that repetitive strain injuries (RSIs) and musculoskeletal disorders (MSDs) such as back, neck and upper limb disorders pose increasing health and cost problems for millions of European workers every year. According to the European Agency for Safety and Health at Work's 2010 report on work-related MSDs¹, 24.7% of European workers surveyed complained of backaches, 22.8% of muscular pains, and 45.5% of working in painful or tiring positions. The report also estimates the cost of work-

related upper-limb musculoskeletal disorders (WRULD) at between 0.5% and 2% of Gross National Product (GNP).

“As demand for RSI prevention solutions and RSIGuard continues to rise, we recognize that customers may prefer to do business with a regional expert who is more knowledgeable about their area, about local government regulations, and about their specific workplace injury prevention needs,” said Erik Andersen, Head of Global Sales for Remedy Interactive. “We chose to partner with Ergo Comfort, Contentus and Arets Ergonomie because they are all experienced in injury prevention, can assist with language translations, and serve as trusted advisors to customers in their respective countries.”

Longtime reseller ergonomicoffice recognizes the value that partnering with Remedy Interactive has brought to their business. “We continue working with Remedy Interactive because they are innovators and leaders in their field,” said Simon Greig, Managing Director of ergonomicoffice. “RSIGuard is a robust software product with an excellent track record that enables user organisations to better manage their HSE obligations.”
